

Joint South Africa-Sweden Research Collaboration Programme

The aim of the Joint South Africa-Sweden Research Collaboration programme is to strengthen Swedish research and higher education by developing and establishing international partnerships. The programme supports projects of high scientific quality which are clearly contributing to the activities of participating educational establishments. The programme is jointly funded by STINT, the Swedish Research Council (VR) and the Research Councils Formas and Forte on the Swedish side and the National Research Foundation on the South African side.

Projects may last for up to three years. Applicants should be employed by and active at a university in Sweden and have obtained their PhD. The proposed project must encompass at least one Swedish and South African party. A parallel application is to be submitted by the South African party to the National Research Foundation (NRF). Applicants may have on-going projects in the Initiation Grants programme, but otherwise there must not be any on-going STINT projects.

The ideal partnership project will have activities encompassing research as well as higher education, although STINT is able to support pure research partnerships. It is of particular importance for young researchers and doctoral students to participate in the exchanges. In this programme, STINT wants to encourage new collaborative patterns and will not prioritise long-standing partnerships. The partnership must be balanced, i.e. the benefits and the personnel exchange should not be primarily in one direction.

Applications will be assessed by experts, focusing on how the proposed international partnership fulfils the following three criteria:

- Contribution to the educational establishments' internationalisation;
- Scientific quality and novelty;
- Planning and support.

Typical questions which clarify the criteria are given below under the 'Review' heading. Please note that only scientific results from the last five years are taken into consideration for the assessment.

Budgetary requirements:

- The annual budget can be a maximum of SEK 200,000. I.e. the maximum budget of a three-year project can be SEK 600,000 (the South African partner applies for a corresponding amount to NRF.)
- The budget for overheads must follow the rules and conditions of STINT (see conditions below).
- The budget may only include costs for internationalisation activities, such as short or longer stays abroad for those involved in the partnership and for organising work-

shops, conferences or similar activities to strengthen and further develop the partnership.

- Salary costs may only be included for stays abroad up to six months per year for doctoral students and postdoctoral researchers. No other salary costs or forms of compensation such as stipends are allowed.
- The applicant must plan and budget for a STINT-NRF kick-off seminar that is to be held in Sweden in March 2018.

It is important that the collaborating parties agree as to the management of any intellectual property rights in connection to the project and its results. Furthermore, the project must be well established with the applicant parties. All applicant parties must have read and approved the final version of the application.

If you have questions about the Joint South Africa-Sweden Research Collaboration programme, please contact Christofer Carlsson at +46 86711997 or christofer.carlsson@stint.se

Applications

Applications are submitted through STINT's electronic application system (<https://ansok.stint.se/>) and include the following sections:

Grants manager and partners (C.V. max. two pages in PDF-format is required for each key person)

- Project title, abstract (200 words), classification and keywords
- Project description; max five pages in PDF-format (minimum font size 10), describing, as a minimum:
 - Objectives in relation to research and higher education
 - Contribution to and from each project partner
 - Project plan
 - Available resources, including existing funding of the key persons in the project
- Participating persons, stays, events and budget data
- Funds requested or received from other financiers.

All applications are to be submitted to STINT **before 15:00 (CET) on September 15th, 2017**. As the submission process varies between STINT and the NRF we kindly ask all applicants to take the differing deadlines into consideration.

Review

The selection of projects is guided by the following criteria and the final result depends on a joint STINT-NRF decision.

Criterion	Sample questions
Contribution to the educational establishments' internationalisation	<p>Why is the partnership necessary?</p> <p>How do the planned activities strengthen on-going research and education?</p> <p>How does the project contribute to the educational establishments' activities on various levels (e.g. individual, research group and institutional)?</p> <p>How will the project lead to new international partnerships whose success or failure is not dependent on a small number of dedicated people?</p> <p>How is the project linked to any internationalisation strategies on the part of the institution and educational establishment?</p> <p>How will the partnership develop after the period of STINT's funding and what are the expected long-term outcomes?</p>
Scientific quality and novelty	<p>What is the level of the project's scientific quality and potential?</p> <p>How does the project contribute to new knowledge and new solutions/innovations respectively?</p> <p>In what way does the international partnership help raise the project's scientific value?</p> <p>How do the competences and resources of the respective parties relate to each other?</p> <p>What scientific results have the project leader and other key personnel had in the last five years?</p>
Planning and support	<p>Is the project plan clear, specific, cost-efficient and realistic (availability of resources), particularly for the first two operational years?</p> <p>To what extent and in what way are key people involved in the project?</p> <p>To what extent are both new and well-established researchers involved?</p> <p>What experiences are there of any previous STINT projects?</p>

Conditions - checklist

- The applicant is employed by and active at a university or college in Sweden and has a PhD.
- The applicant has no on-going STINT-funded project with a longer duration than one year.
- The application explains how the planned partnership contributes to the activity of involved educational establishments, i.e. the benefit to contributing parties in each country is described.
- The proposed project starts no later than June in the year after the call closes and has a planned duration of no more than three years.
- The budget relates only to costs for internationalisation activities, such as short or longer stays abroad for those involved in the partnership and for organising workshops, conferences or similar to strengthen and further develop the partnership.
- The budget does not incorporate salary costs (however salary is permitted for doctoral students and postdocs for up to six months' stay abroad). No other salary costs or forms of compensation such as stipends are allowed.

- The budget does not include any other overhead costs than the maximum rate of SEK 100,000 per year and full-time equivalent for doctoral students' and postdocs' stays abroad (if covered by salary through the STINT grant, see previous item in the checklist). Shorter periods and part-time commitments decrease the cost accordingly. E.g. for a one-month overseas visit by a PhD. student where salary costs are fully reimbursed (100%) the maximum allowed overhead would be as follows: $SEK\ 100,000 * 1,0 / 12\ months = 8,333$
- The final version of the application has been read and approved by all parties involved.
 - The applicants agree to cooperate in accordance with the principles of academic freedom and good research practice. Methods, data and results will be openly accounted for.

Timetable

2017	July	Application system opens
	September	Sep 15 th , 15:00 (CET) STINT application deadline for projects starting spring 2018
	December	Joint selection decision in late December (indicative)
2018	March	Kick-off Meeting Sweden
2019	March	1st situation report
2020	March	2nd situation report
2021	June	Project end and latest disposition of funds
	August	Final project report

Reporting

Grants are normally paid twice per year (in May and November) provided that contract/reports have been received and approved beforehand. The figure above is a timetable for a typical project.

All project reports are submitted electronically through the STINT application portal (<https://ansok.stint.se/>). The final report detailing results and experiences from the entire project is to be received within three months of the end of the project.

Requests for extensions will be viewed restrictively. However, parental leave or long-term sick leave on the part of key persons will constitute grounds for extending the period for which a STINT grant is made available.
