

Overview STINT Internationalisation Index Kristianstad University

Comments to the index

Total index is a weighted sum of all six dimensions:

- 40% Research: International co-publications
- 20% Mobile students
- 8% Int'l PhD students
- 12% Education in English
- 15% Faculty with int'l academic experiences
- 5% Leadership with int'l academic experiences

Research: The field-weighted internationalisation score compares the share of international co-publications with other publications in the same scientific field, published the same year in the same type of publication. Global average is always 1,00

Mobile students: Incoming as well as outgoing. The latter only within exchange programmes. Data from UKÄ

PhD students: International PhD students at Swedish HEIs. Data from UKÄ,

Education in English: Credits given in English compared to all credits given in programmes and courses. Data from the database behind universityadmissions.se

Share of faculty with research abroad: Should have at least one publication with a foreign affiliation. Data from Elsevier, based on Scopus publications.

Share of faculty with PhD from abroad: Data from SCB.

Leadership with international academic experiences: Same as for faculty but only for the vice chancellor and the pro-vice chancellor(s). Data is not presented in this overview.
