

Overview STINT Internationalisation Index

Malmö University

Research: Field-weighted internationalisation score

Share of mobile students

Share of int'l PhD students

Share of education in English

Share of faculty with research abroad

Share of faculty with PhD from abroad

Comments to the index

Total index is a weighted sum of all six dimensions:

- 40% Research: International co-publications
- 20% Mobile students
 - 8% Int'l PhD students
- 12% Education in English
- 15% Faculty with int'l academic experiences
 - 5% Leadership with int'l academic experiences

Research: The field-weighted internationalisation score compares the share of international co-publications with other publications in the same scientific field, published the same year in the same type of publication. Global average is always 1,00

Mobile students: Incoming as well as outgoing. The latter only within exchange programmes. Data from UKÄ

PhD students: International PhD students at Swedish HEIs. Data from UKÄ,

Education in English: Credits given in English compared to all credits given in programmes and courses. Data from the database behind universityadmissions.se

Share of faculty with research abroad: Should have at least one publication with a foreign affiliation. Data from Elsevier, based on Scopus publications.

Share of faculty with PhD from abroad: Data from SCB.

Leadership with international academic experiences: Same as for faculty but only for the vice chancellor and the pro-vice chancellor(s). Data is not presented in this overview.
